

# Zirconite

## STAGE 2 - GLAZE

**Zirconite Glaze:** Unique blend of PTFE and acrylic resins containing UV screens.

**Unrivalled Gloss & Protection:** Leaves a deep deep gloss shine and a protective barrier for today's modern paint finishes

**Tested to extremes:** Zirconite Paint Protection system has undergone the most rigorous of development regimes, making it suitable for use in the harshest of climates and environments from Scandinavia to the Middle East.

**Low Chalk:** Minimises rubber or plastic staining – No dusting problems.

**Environment Friendly:** Unique water based formulation contains no aromatic solvents.

**Bodyshop Approved:** Contains no volatile silicones.

**Directions:** Shake well before use. Apply to pre-treated area, section by section, using a clean soft cloth in a conventional polishing manner. Do not over apply or use in direct sunlight.

Treat vehicle section by section, allowing paint surface to haze, then buff to a deep shine with a dry CAP4 micro-fibre polishing cloth. Alternatively use polishing machine with black foam mop.

**Do not** allow the vehicle paintwork to come into contact with rain for at least 4 hours after polishing.

**Do not wash** the vehicle for 1 week after application to allow the polish to fully cure.

### Typical Specification:

Composition : An emulsified blend of P.T.F.E, acrylic resin, waxes, non volatile silicones, polishing aids, non aromatic solvents in water.

Appearance : Opaque liquid

PH : 8.0

Colour : White

Viscosity : Thick liquid

Perfume : Warm fresh

Stability : Protect from freezing. Store at ambient temperature.

Shelf Life : Twelve months minimum in unopened containers.

Packaging : 125ml & 1L Plastic Containers

Zirconite Glaze is a Trade Mark of Concept Chemicals & Coatings Ltd

CODE: 471
